### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Firstly, it should be noted that the Examiner erroneously commented in the prior advisory action that the prior rejections of claims 4 and 5 would appear to be valid on the claims as presented in the amendment received 5/1/07, the error lying in the fact that the previously applied reference had been disqualified as prior art by the affidavits received 11/21/06. Also Nakamura was disqualified as prior art by the certified translation of Applicants' foreign priority document. A new search on the claims in their current form yielded no new references.

Therefore, the prior art of record does not disclose or fairly suggest a SAW filter having every one of the recited features including an insulating pattern and a conductor pattern that defines wiring traces and especially wherein at the specified portion where wiring traces face each other "a ground wiring trace is disposed directly on the piezoelectric substrate; and at least one of the wiring traces having a different potential from that of the ground wiring trace is disposed on the insulating pattern" (see claim 1, the last five lines thereof), or wherein the insulating pattern includes resin (see claim 4, the last line thereof) or has the recited thickness (see claim 5, the last line thereof).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
